FRIDAY AUGUST 20th 1943

NUMBER 18

Mrs. Elmer Rusk Dies After A Lengthy Illness

After a lengthy illness, during which time she spent three months in hospital, Mrs. Elmer Rusk, aged 55 years, passed away Monday evening in the presence of her husband and her children living in this part of the Province. Two of the boys are in England in the Canadian Army one boy is at home & two married daughters, Mrs. Andy Rae of Calgary and Mrs. A. D. Terry of Lethbridge are left to mourn her passing and to them we extend our sympathy and condolences.

Funeral services were held in the 2nd Ward Church Wednesday afternoon at 2 p.m. conducted by Rev. H. P. Marston of Magrath, United Church Minister. The 2nd Ward Choir was present directed by Jos. McLean, with Mrs. Emma Dahl at the organ and they sang the opening and closing numbers, the Rev. Marston taking the prayers and preaching a fine sermon on the purpose of life. W. C. Stone a close acquaintance of the family was also a speaker and paid tribute to the life of service of deceased to her family & also in community efforts where ever she was asked to help. Special musical numbers were a Vocal Trio by the Bennett girls "The Lord is My Shepherd," and a solo by T. K. Roberts, "The End of a Perfect Day."

The floral offerings were beautiful and profuse & a large cortege followed the remains to the cemetery where Christensen Bns. were in charge of interment.

EDMONTON DISTRICT CROPS MADE LATE BY TWO MONTHS OF RAIN

Edmonton, Aug. 16.—Residents of this area find it hard to believe that southern Alberta has had a drought this summer. They have been soaked by torrential downpours day after day for more than two months and are still scanning the heavily overcast skies for a clear patch of blue.

So much rain has fallen and so often that growth of crops has been set back from two to three weeks—in some areas more—and farmers are worrying whether the grain will mature before frost strikes.

Growth has been thick but slow and thousands upon thousands of acres of wheat have just now headed out.

A yellowish tinge is seen in the color of grain stands, but not because they are beginning to mature. It is a sickly yellow which resulted from lack of sunshine.

Only the odd field of barley was seen beginning to ripen by this reporter as he toured this region.

In scores of fields patches of grain will never be cut for the cereal. They are making slow growth out of the numerous sloughs which formed during the frequent rains.

Farmers who have gone into the livestock business look stock and barrel are becoming more concerned from week to week as drenching rains continue and the ripening of coarse grains is delayed. They will need millions of bushels of feed grains this winter if they are to continue their extensive livestock operations.

Hay—there is plenty of it everywhere in the fields but in some sections about this booming city farmers are having a trying time to harvest it. They

Attention Farmers

I. Bliss Roberts and Wm. A. Anderson, who are members of the District Farm for Victory Committee both have application forms for soldier help for harvest, and interested parties may get blanks from them and fill them up. We understand from Mr. Roberts that a minimum of 12 days work is required in order to obtain help under this arrangement.

Jos. Chabay met with an unusual accident Monday when he was in a small boat on a lake at his farm and broke his arm while trying to crank the motor. He was taken to Lethbridge for treatment.

managed to put up much hay during the few dry spells during the winter but some of the haycocks which are now in fields have been there for weeks.

Also in fields are stooks from 1942 grain crops. Scattered here and there can be seen fields with stooks that have turned almost black since last fall. It was only towards the end of July that many other farmers cleaned up their 1942 threshing operations.

Another great worry of farmers is the manpower problem. Only a few men, at best, are available for the harvest season and farmers fear that even these may be drawn away to other work.

The chief concern is wages, and one can easily see why after viewing the numerous and huge construction projects in this area and northward. American contractors are offering high wages—as high as the Canadian war labor board will permit—and farmers fear that they will be forced to compete against them to secure harvest labor.

There is not the slightest sign of harvest starting yet but the talk is already making rounds of \$8 and \$9 a day for harvesting here and fears are that it may go higher.

Farmers in this immediate area are watching two things to gether when they think of the manpower problem. They see thick stands in their fields with the promise of heavy yields. They see, too, the start of construction on an airport by the Americans just off the northern limits of the city at a cost of about \$10,000,000. This job will need thousands of workers.

While the talk in agricultural circles concerning grain is that Alberta's wheat crop this year will be in the neighborhood of 80,000,000 bushels, those interested in livestock are hoping for more feed and more workers—both on the farms and in the packing plants.

If farmers do not get sufficient feed for the winter, there may be more sacrifice selling. That, this reporter was told, would tend to force prices down and precipitate a serious congestion at packing plants, which are operated here by four large companies.

Like most industries in this area packing plants are wrestling with a labor shortage. Their staffs have been depleted, and at a time when the livestock production of the north has risen to an all-time high. Many, many carloads of cattle and hogs sent to Edmonton packing plants can not be handled here and are shipped eastward.

—Lethbridge Herald

Hospital Vote 'Yes' By Big Majority

Tuesday's voting gave the Hospital scheme the "Yes" vote by a strong majority, the Raymond vote being almost solid for the Hospital. The breakdown of the voting was as follows:

	For	Against
Raymond	645	10
Stirling	9	155
Welling	17	25
Mammoth School	7	0
O. K. School	20	0
Totals	694	190
Total votes cast		884

78.5 p.c. for the Scheme.

The Committee now awaits word from Edmonton regarding the visit here of the Department Engineer to assist in choosing a location and deciding on the plans and specifications for the building. There is apprehension expressed by many regarding priorities for materials, but in view of the fact that three new Municipal Hospitals were erected in Alberta last year, and the fact that our

district is certainly badly in need of Hospital accommodations here in the centre of the district, it is the opinion of the local Board, as well as the Department of Health the materials will be available when the time comes to proceed with the building. A number of locations have been suggested, all good ones, but the local Committee have not settled on any as yet, as there are questions peculiar to Hospitals in this respect that may rule many apparently very fine locations out, and the Health Department officials of the Province, who have had a great deal of experience in these matters will lend their knowledge and experience to the local officials in making a decision on this matter.

Now the verdict has been given, let's all unite as one and get the building up, the equipment in and the Hospital in operation just as soon as is possible.

NEWS NOTES

Harold Card of the Royal Canadian Navy, stationed at Victoria has been home on leave and is returning on Sunday.

Mr. Wilde who operated a store here for about a year two or three years ago was in town Friday on business and renewing acquaintances.

Born to Mrs. Alice Snow Jensen, on Sunday, August 15th, a six pound baby girl. Mother and babe are doing fine. The father is in the U.S. armed services.

Pilot Officer Howard Hicken left on Tuesday for Eastern Canada and expects to leave Canada before very long. Howard completed his training and got his wings at St. Hubert, near Montreal.

Sid Romeril, who has been in the Canadian Army for more than two years and in England for a year or so, has recently transferred to the Air Force and is home now for a visit and will take air force training in Canada.

Fire of undetermined origin, completely destroyed the home and contents of the Japanese beet workers on the N. Y. Taylor farm north of town. Several versions of the blaze have been circulated, but just exactly how it started has not been ascertained. The loss to the family is decidedly heavy it is reported.

Now let's get busy and have a Hospital
as good as this picture or better.

Miss Retta Fawns Passes Away

SGT. VERA SHIRLEY

who will be in charge of the C. W. A. C. Mobile Recruiting Unit which will visit Raymond from 2 to 10 p.m. next Mon., making the Town Hall their recruiting headquarters. See the ad. elsewhere in this issue.

F. O. Geo. N. Keith War Casualty

F.O. G. Noel Keith, who attended school in Raymond and spent a year in Western Canada College at Calgary before enlisting in the R.C.A.F. is dead according to a telegram received Sunday. His plane was shot from under him and he baled out, landing in shallow water and injuring himself so severely that he passed away the same day.

Noel had made a brilliant record in the Air Force having been in Malta in the hottest fighting and having eight enemy planes to his credit. We extend our sympathy to his parents and brother and sisters in their bereavement. Another son, Howard, was killed in an airplane crash at Summerside, P.E.I. about two years ago.

CITY DADS MEET

The Town Council met last Thursday night in regular session. The payroll was passed and ordered paid and the business of the meeting was soon disposed of. The filter and storage tank at the Romeril dam will be thoroughly cleaned and overhauled which will make an improvement in the water supply. The splendid appearance of the Town Hall grounds was commented on. Another improvement in the Town Hall itself will be the hot water system of heating to replace the hot air which has never been satisfactory. Jimmy Anderson has this work in charge.

LIONS MEETING

Mr. and Mrs. A. V. Palmer and kiddies of Calgary were Raymond visitors over the week-end with relatives and friends.

Alma Smith of the R.C.A.F. son of Mr. and Mrs. S.B. Smith was home on leave over the week-end. He has been transferred to Calgary for a few months training.

Elders H. Myron Holmes and Jas. B. Meeks were Raymond 1st Ward speakers Sunday evening on their regular Home Missionary appointment. Miss Myra Dahl rendered a vocal solo on the program accompanied by her mother.

Miss Retta Fawns, 23, daughter of Mr. and Mrs. E. J. Fawns, passed away Monday evening in Lethbridge, never coming out of the ether following a serious operation. She had been working in the Film Exchange in Calgary and came home two weeks ago for her holidays, and when her condition grew steadily worse she was taken to the Hospital Monday morning for an operation and passed away there toward evening of the same day. She is survived by her parents and brothers and sisters, and to them we extend our deepest sympathy in their sorrow.

Funeral services were held in the First Ward Church Thursday afternoon with Bishop J. O. Hicken in charge. The choir was under the direction of Ira McBride and Roi Stone was at the console.

"I Need Thee Every Hour" was the opening song followed by invocation by Pres. Heber F. Allen former Bishop of the ward.

Speakers were Pres. Melvin T. King and Elder Paul Redd both teachers of deceased during her years in school. Elder C. E. Alfred a neighbor of the family for many years and Bishop J. O. Hicken of the 1st Ward. All spoke in highest terms of the fine exemplary life of deceased and the service she and her parents had always rendered in the church and community. They spoke of the plan of life and salvation and offered comfort and consolation to the sorrowing parents in their knowledge of the Gospel and the hope it held out for reunion of the family beyond the grave.

Special musical numbers were a vocal duet by Miss Beth and Mildred McBride, a vocal duet by Mesdames J. C. Snow and T. T. Mendenhall and a vocal solo by Mrs. Wilford Brandley of Stirling.

The closing song was "We Lay Thee Gently Down to Sleep" and benediction was offered by Elder J. Golden Snow.

The floral offerings were beautiful and many, and the lovely wreaths from the Film Exchange where Retta worked were a lovely token of their appreciation of her labors. A large number of cars followed the remains to the cemetery where interment was made, the grave being dedicated by Elder T. T. Mendenhall.

Examination returns are about all in now. Twelve received their returns some time ago, nine followed after a few days and Grade eleven returns arrived the first of this week.

The Raymond Lions met in the Sugar Bowl for their regular meeting which was well attended for this busy time of the year.

The meeting opened in the usual manner prayer being offered by Lion Rulon Dahl.

Lion V. Heggie reported that some work should be done at the Skating rink in preparation for the coming season.

It was decided not to hold meetings in the month of Sept. as most of the members would be busy harvesting.

The meeting closed by singing the National Anthem after which the club spent the evening playing Fast Ball.

THANKS! NEIGHBOR!

The Hospital vote is over, and successfully, and as member of the Committee representing the Town of Raymond, I would like to say thank you, very earnestly to every voter who put forth the effort to get out and vote and to the men and women who donated the use of their cars and also their time to see to it that voters used their franchise on this important question. We put it over.

As with every question, there were very decided differences of opinion throughout the district with respect to the need of the hospital and the services it could render and so on. Now

that the vote is over and the verdict given, we hope that we can all be good sports and co-operate in every way to see that the building is erected and put into service without undue delay. We know that many are fearful that nurses will not be obtainable to staff it when completed, that we may lose our Doctor, that supplies will not be obtainable and many other things. These things have been used as arguments against proceeding with the scheme. Could not we let the local Committee worry about these things when the time to worry comes and in the meantime go to work to get the building up? These will be problems, but we have not heard of any Hospitals closing because of a lack of nurses or supplies. In the majority of cases, essential hospitalization is provided when needed, so

LOOKING AHEAD

In 1942 we succeeded in establishing the Cheese Factory. This year we have succeeded in getting the verdict of the people to establish a Hospital for

that all this would be a different allotment of the supplies already coming into Southern Alberta.

Again we say thanks, to everyone. Those who voted yes, those who voted no, and those who didn't vote all deserve thank you. Now, let's get busy and get our Hospital.

Raymond and district. What of next year? Is there anything mooted to be put over in 1944?

There is one thing we might be studying, and studying seriously, and this is some improvements in our Main Street, and possibly a concentrated study of our sewage and drainage problem. We are not finding fault nor do we wish to be critical. But we have carried on for a number of years now and done nothing but talk about these essential and necessary matters. While we have been talking, Claresholm, a town not as large as we are, has installed, or is installing an up-to-date sewer system and disposal plant. If they can get the materials, then why can't we? Some argue that we should not increase our debt for our children to pay. Can you

WHO SAID THIS ISN'T A WOMAN'S WAR - TOO?

Canada needs competent women from 18 to 50 to take over the jobs of soldiers needed for overseas—this is a woman's war, too! It is your duty to serve with the C.W.A.C.

THE WARTIME PRICES AND TRADE BOARD

FOUR THINGS TO DO to get your new book

- 1 Fill in the application card—which is the first postcard in your present ration book. DO THIS AT HOME.
- 2 PRINT clearly—do not write—the information required, and sign at the bottom with your usual signature. Follow the method on card illustrated.

TO THOSE ON VACATION

If you are staying at a summer cottage, with friends or relatives, or at a hotel as a non-permanent guest, give your usual or permanent address on the application card.

- 3 Do not detach the card from your ration book. This must be done by an official at the Local Distributing Centre. If already detached, it should be brought in along with your present ration book.

- 4 Persons of 16 years or over must sign their own cards. Cards of persons under 16 years must be signed by parents or guardians. Children under 16 will not be allowed to apply for new ration books, either for themselves or for other members of the family.

point to any town or city that has shown consistent progress and has not bonded itself to achieve these things. There probably are some, but they are few.

We have talked several roads as long as I can remember. While we have been talking Cardston has oiled several blocks in her business section, and her stores and offices are, to quite an extent free from the perpetual dust menace that harries shopkeepers and store clerks here. Couldn't we do this for a couple of blocks of Broadway? This is not permanent we know, but stand on the street when we have a windy day and watch the squinted faces of pedestrians, and even motorists as the dust swirls around and then hear visitors berate us for such a condition. Go into the stores after a high wind and see the

clerks busy shovelling out the dust, and besides this extra work calculate the loss to the business men in materials from these dust storms every so often.

We are at war. Materials are difficult to obtain, some impossible. But we ask in fairness and with our malice, does this give us an excuse to sit down and do nothing, while neighboring communities are forging ahead little by little with the very things that we need so badly?

NEW CLASSES CALLED TO THE ARMED FORCES

Husmphy Mitchell, Minister of Labour, today announced the call to military training of married men, ages 27 to 30 inclusive, & of all men who reach the age of eighteen this year. This call, Mr. Mitchell stated is pursuant to a decision reached by the Cabinet Council. As in previous calls those in the classes mentioned will be required to present themselves for examination and, if found fit and accepted, they will train and serve in the Armed Forces in Canada and her territorial waters.

The Minister explained that the call covers all men not here before designated or already under arms, and whatever their marital status, who were born in any of the years 1916, 1915, 1914 and 1913. Similarly the call is to men born in 1925, save that none of these will be served with "Orders-Medical" until he reaches the age of eighteen years and six months. Arthur MacNamara, Director of National Selective Service, stated these "Orders-Medical" to the men covered by the Minister's announcement will be mailed as rapidly as possible from the offices of the Registrars in the thirteen Mobilization Divisions.

Director, Agricultural Department
North-West Line Elevators Association

What We Have, We Hold!

This fall and winter, the farmers of Western Canada will have to store a large proportion of Canada's grain stocks. The greatest dangers to farm stored grain are moisture and insects. Uniformly dry grain is not subject to insect damage or spoilage.

If trouble begins, however, the farmer's position is difficult because he rarely has accommodation or equipment for turning or cleaning large amounts of grain. Note the following precautions:

1. Repair leaky roofs to exclude rain and snow.
2. If possible have wooden floor with air space underneath.
3. Much damage has resulted from concrete floors, but a covering of moisture-proof paper will help.
4. Before filling granary, clean thoroughly. Brush down walls, and sweep floor with damp sawdust. Then sprinkle a little hydrated lime over the floor and sweep it about to fill all cracks.
5. If granary was infested with mites or insects last year, give the entire inside a coat of white wash containing 1/4 pound of lye per gallon of solution, and allow to dry thoroughly before binning grain.
6. Don't fill granary to roof, but provide all possible ventilation without allowing moisture to enter.
7. Open bins or piles are risky. If unavoidable, they should be on well drained ground, and two or three feet of straw should be on the ground under the grain. Piles should be uniform cones. A covering of hay or sheaves may help, but should be removed before warm weather arrives in spring.

Contributed by Dr. B. N. Smallman, Board of Grain Commissioners for Canada, Grain Research Laboratory.

Pres. A. E. Palmer and Mr. and Mrs. John Green of Lethbridge were Raymond visitors Wednesday.

Pres. M. T. King and Elders Wm. Nalder and Alvin Jones were speakers in the Magrath and Ward last Sunday evening.

Something unusual occurred this week when all eight daughters of Mr. and Mrs. D. A. Bennett were at home at the same time for a reunion and to bid good-bye to Whitney. Quite an event and a happy reunion for the entire family.

C.P.R. Beats Obstacles to Move Wartime Shipments

PARTICULARLY adapted for handling outside and odd-shaped war shipments, Canadian Pacific Railway flat cars shown above — empty and with loads of boilers for corvettes, a huge transformer and a welded-steel boat — have been of great aid to the war effort of Canada and the United States. Recently the company's largest depressed-centre flat cars, one of which is pictured at the bottom — this layout, were the only ones which could handle a 150-ton tank — 135 feet long and 12½ feet in diameter — from Lachine, Que., to a synthetic rubber plant in southwestern Ontario.

Two of these huge cars now are on loan in the United States hauling marine engines for the Kaiser

shipyards, a type of shipment in which the Canadian Pacific pioneered, as illustrated upper right, where two smaller depressed-centre flat cars are shown, each loaded with a corvette boiler. These important shipments lowered 21 feet, five inches above top of rail when blocked up to get them by certain half-deck girder spans on many bridges and at some bridges this blocking had to be removed, while the boilers were held up by jacks, and the shipment lowered to clear the bridge.

The company's engineering department laid down the special moves necessary to get the corvette boilers from Toronto to Quebec, listing all permanent installations which had to be removed temporarily. The technique

initiated by the Canadian Pacific for this movement has since been copied by other roads to the great profit of the war effort.

In the matter of the transformer (upper left) the main consideration was to get equipment heavy enough to carry it from Toronto to Milton, Ont., with its weight of 134 tons being only one ton less than the maximum load capacity of the biggest depressed-centre flat car the company has in its freight rolling stock of 77,710 pieces, all in war service. The boat (centre) was an advanced load with a maximum width of 12 feet, 10 inches. It was 61 feet, six inches long and was transported from Owen Sound, Ont., to St. John, N.B., on two machines.

HARVESTERS MAY RIDE IN TRUCKS

To help ease the farm labor situation, farmers are granted permission to transport harvest labor in trucks to and from harvest operations, according to an announcement made by Hugh McAfee, Services Officer, Truck Control, Wartime Prices and Trade Board.

This permission is extended throughout Alberta, Saskatchewan and Manitoba by M. W. McCutcheon, Administrator of Services for the Prices Board. Now effective, this time extends until November 15.

Crop harvesting applies to potatoes and root crops as well as to grains Mr. McAfee states.

FARM FOR VICTORY SOLDIERS AS HARVEST HELP

Recent announcements by radio, and articles in newspapers have stated that soldiers will be available for harvest this fall. Arrangements have been made for sending soldiers out, and they will be sent in the same order in which applications are received. Therefore farmers wishing to obtain soldier help should get their applications in immediately. Such applications may be placed with the District Agriculturist or with members of the Farm for Victory Committees in the different communities. Applications may be phoned to the District Agriculturist in Cardston.

The rate of pay for soldiers

will be \$4.00 a day and board, straight time, exclusive of Sunday. No attempt will be made to assign any particular man to a particular farm; in handling large numbers of men this would be impossible. You are urged to get your application in at once.

PREPARING FOR NEXT SPRINGS LAMB CROP

How good or how poor the lamb crop will be next spring depends largely upon the care of the ewes from now until that time. The care of the ewe not only governs the number of lambs born but also the strength and vitality of such lambs. The old idea that the birth of twins or triplets depends upon the male is wrong. The number of offspring born at a time depends largely upon the number of egg cells released from the ovary of the female. This, in turn depends upon the condition of the female animal at that time. The number of egg

cells released in breeding ewes can be greatly increased by the proper management of the flock. This system of management which has been used to very great effect is known as flushing. Two or three weeks before breeding time begins ewes should be placed on green pasture, a cover crop serves very well in this regard. When they have reached a thrifty condition they are in the best shape to breed.

Lack of phosphorus has been found in many cases to be responsible for poor lamb and calf crops. The supplying of phosphorus mineral supplement to cattle has definitely been established as a good practice to increase the calf crop. It is quite likely that supplying a salt-bonemeal mixture, or a salt-monocalcium phosphate mixture will help to increase the number and vitality of lambs born next spring.

After breeding the care of the ewes is very important. The vitality of lambs at birth will depend largely upon the ration of the ewe. Good well-cured hay is necessary to keep a flock of ewes in proper condition in the country, except in an open winter where there is an abundance of grass. If the ewe is to be in condition to supply the proper amount of milk at lambing time she will usually require some grain along with the grass or hay ration. In all cases ewes should have a mineral supplement during the winter. This supplement should contain both phosphates and iodine. In regions near the Rocky Mountains water is especially lacking in the diet, and flabby lambs which soon die, as well as goat lambs are common. This condition can be avoided by supplying iodine. A good mixture can be made from 150 pounds of granulated salt, 150 lbs mono calcium phosphate and 1 ounce potassium iodide. This should be kept before the flock of ewes at all times.

Experiments at the University of Alberta show that oat bundles is one of the poorest forages for pregnant ewes. The lamb crop and the condition of the lambs was unsatisfactory when the ewes were wintered on oat green feed. Good hay and especially legume hay seems to supply some requirements in which oat green feed is deficient.

Our National requirements call for an increased production of both mutton and wool. One of the best ways to increase production is to get more lambs from the number of ewes in our flocks. This not only is to the National interest but reflects itself in additional profit to flock owners.

A construction crew is working in Claresholm now laying a disposal plant. This will make their sewer lines and building a very fine addition to the public services of Claresholm and we congratulate our neighboring town.

cels. — Julius Nemedy, Raymond

NEWS NOTES

Holly DeMeester of the Air-
force Ground Crew was home
on leave for a week or so and
left Wednesday to resume his
training.

Blayne, son of Mr. and Mrs.
A. W. Jones who is attending
business school in Calgary,
spent Monday night at home
with his parents.

The Raymond 2nd Ward Dea-
cons and their supervisors spent
Thursday in an outing at Hen-
derson Lake Park near Leth-
bridge. A very enjoyable day
is reported.

Paul G. Schneider, Jr., Ivan
Wilde and Ivan's small son had
an experience they won't soon
forget the first of the week,
when the truck, with a tank of
water on it skidded on the can-
al bank as they started to pull
away and tipped over into the
canal pinning all three in the
cab. They managed to break out
before anyone suffered except
from the ducking. The truck
was bent up some but not seri-
ously damaged. They are for-
tunate and thankful to get off
so lucky.

A want ad will tell it — sell it
— trade it — or rent it. Try it!

LOST — 2 bay geldings brand-
ed Hazy T or anchor, left thigh
also black branded bar over JV
on right thigh. Hold and phone
R112, Taber, for reward. 3A27

FOR SALE — 3 sows, one
ready to farrow; good acre lot;
2 complete beds; 18 laying
hens 1928 Studebaker car, new
rubber & in good shape; dress-
er; battery radio; cook stove;
kitchen and extension table;
tubs; boilers, dishes and etc. —
Steve Kindt, Raymond.

Buy War Savings Certificates.
